

Nominee: Volta Data Centres

Nomination title: Colocation Provider of the Year

2017 has been a huge year for Volta, celebrating 4 years in September as an operating site. Volta has been placed on the UK Technology Fast50 list, which is compiled each year by professional services firm Deloitte, ranking number 20 among the country's fastest growing tech companies. Volta's location in zone 1 in London offers unique proximity to organisations with offices in central London, as well as easy access for organisations based outside London with excellent transport links. Volta disrupted the market by challenging the traditional fixed-term contracts and SLAs. Volta Data Centres offers services that no other data centre provider offers with its Platinum Power SLA and its Power by the Hour SLA.

Why nominee should win

- Being placed on the UK Technology Fast50 List.
- Volta had 100% retention.
- Increasing the number of carriers, offering even more choice to customers.
- Volta increased its occupancy by 268%
- Offering a unique service with Platinum Power SLA and Power by the Hour
