

Nominee: ATEN Technology

Nomination title: 4K HDMI Single Display KVM over IP Extender

Utilizing expertise in over IP KVM solutions, KE8950 are IP-based HDMI KVM extenders that allow access to a computer system from a remote USB console to anywhere over an intranet. The KE8950 KVM over IP Extenders support one HDMI monitor at each end, providing a greatly improved video display image with 4K x 2K video resolution (up to 3840 x 2160). KE8950 also support 1Gbps SFP fiber module expansions, enabling connections via fiber optic network to extend distances in transmission.

Why nominee should win

- Fast Switching
- create multiple video walls with up to 8 x 8 (64 displays max.) in each layout
- Advanced Scheduling – improves efficiency and saves costs by allowing media playback to be set based on time and date
- Video grouping of up to 4 sets of KE series devices to support Multi-Display applications
- Remotely access computers on your KVM installation via intranet
