

Nominee: Socomec U.K Limited

Nomination title: Socomec Modulys RM GP

Integrated power specialist – Socomec – has extended its range of industry leading UPS equipment to address the evolving demands placed upon those responsible for managing Data Centres, critical buildings and facilities.

With designed-in flexibility, Socomec’s latest development ensures that every hard working electrical infrastructure can protect its organisation’s vital assets whilst demonstrating real adaptability – quickly and easily responding to the constantly changing challenges in terms of power availability and efficiency.

Socomec’s latest modular rack-mounted UPS development addresses short-term capacity issues whilst meeting longer term growth requirements – delivering reliable, safe, high quality power to the most demanding critical applications, that can be scaled rapidly to meet changing demands.

Rack-mounted modular UPS - for easy, fully-assured and time-saving integration

Socomec’s Modulys GP is a 3-phase modular UPS system designed for 19” rack integration across multiple applications. Easy to integrate and install whilst simple to manage and maintain, it provides maximum availability and power protection in a compact design - leaving space for other rack-mounted devices.

Modulys RM GP has been specifically engineered with full flexibility and fewer parts in order to simplify and optimise every step of the integration process – from sizing to installation – de-risking the entire project.

As a completely modular system – designed with no single point of failure – Modulys RM GP delivers reliable power whilst ensuring optimum load protection, even during power upgrades or maintenance procedures.

- What tangible impact has your product/solution had on the market and your customers?
- This product is new to the market; our customers have appreciated the Modulys RM GP’s scalability in a small rack mount along with its flexibility and high efficiency.

- What are the major differentiators between your product/solution and those of your primary competitors?
- Highest rack-mounted UPS power density on the market
- 3 + 1 25kW

- Hot swappable static by pass
- No single point of failure
- MTBF >1,000,000hr, the average on the market is 300,000 hr.

Why nominee should win

- New product designed, developed and manufactured in Europe.
- The entire Socomec Green Power 2.0 UPS range is designed to operate in compliance with the EU code of Conduct governing data centres for reducing energy consumption and associated carbon emissions.
- A commitment by an independent manufacturer to invest 10% of turnover in to R&D
- Socomec's integrated critical power solutions have been designed with all types of data centres in mind, including new build and refurbishment projects, within small, medium and large data centres.
