

## Nominee: Digital Realty

---

### **Nomination title: Amsterdam Data Tower**

The Amsterdam Data Tower represents the first phase of a redevelopment and expansion of the AMS1 data center at Amsterdam Science Park. The Amsterdam Data Tower is a state-of-the-art, carrier-neutral facility that offers a comprehensive ecosystem of telecom organizations, ISPs and cable providers to meet customers' connectivity needs. The 72-meter-high tower offers customers 56,241 sq.ft of data floor and nine megawatts of IT load. The facility was designed and built with the latest in advanced technologies, offering customers seamless and efficient access to more than 150 network hubs, including the Amsterdam Internet Exchange, AMS-IX – the world's largest transport hub – as well as NL-ix, the Neutral Internet Exchange.
