

Nominee: Dataracks

Nomination title: The Dataracks 303 ECO SSF cabinet

Dataracks 303 Eco SSF Cabinet

Cambridge-based DC solutions manufacturer, Dataracks, were recently presented with the results of a comprehensive benchmarking exercise undertaken by a global IT brand into a number of leading DC rack suppliers including Rittal, APS, Vertiv as well as Dataracks. The analysis was needed for a major supply of new cabinets and covered the key criteria of product quality and suitability, pricing, servicing and client relationship as well as factors such as stock availability, accessory range, ease of ordering, reputation and unique differentiators. We are proud to report that the Dataracks 303 Eco cabinet came out as the clear No1 choice in all key criteria and a major order has been secured!

The award-winning Dataracks 303 Eco cabinet is the result of much customer feedback, and incorporates the latest design features for the modern data centre. Maximizing airflow and supporting free air cooling, these cabinets meet the Best Practice recommendations of the EU Code of Conduct on Energy Efficiency for Data Centres. The Dataracks 303 Eco cabinet range is supplied in steel for maximum structural rigidity and supports best practice cabling management. Suitable for use with virtually all hardware brands without adapting components, the 303 Eco cabinet range is the natural choice for all server and switching storage requirements.

The latest version of the Eco cabinet, the SSF model, has now been specifically adapted to offer added security, safety and fire protection:

- Security upgrade with biometric locks, multi-point locks and full audit trail;
- Improved safety with door open alarms and a strong rigid construction;
- Enhanced fire protection with condensed aerosol fire suppression.

A quick overview of its principal features:

- UK-built to the highest standards with best practice airflow and security
