

Nominee: Dataguise

Nomination title: DgSecure

Dataguise DgSecure delivers the most precise data-centric governance solution that detects, audits, protects, and monitors sensitive data assets in real time wherever they live and move across the enterprise and in the cloud.

The company makes sensitive data governance easier with an out-of-the-box solution that's simple to implement and use — no programming required — saving time, resources, compliance costs, and complication. That means that organizations can do with their data what they couldn't do before due to security concerns: make better business decisions, gain greater customer insight, move to the cloud, and generate new revenue streams.

Why nominee should win

1. DgSecure is the only data governance platform of its kind to deliver a comprehensive data security and compliance solution for all data source types, allowing users to quickly understand what, where, and how sensitive data is detected, protected, and accessed across the enterprise.
2. Dataguise DgSecure is the most complete solution of its kind for big data, databases, and unstructured data, providing sensitive data detection, protection, monitoring, and auditing.
3. Dataguise delivers military-grade encryption and data masking ensure complete and absolute data privacy.
